Boreal Apothecary Supply Co.
1400 Nicollet Mall, Suite 510
Minneapolis, MN 55403

Subject: Renewal of Cold-Press Supply Agreement and Q1 Batch Schedule

Dear Dr. Lindholm,

Thank you for hosting our formulation team in Minneapolis last month and for sharing the stability test results from your autumn production run. Your feedback on cold-filtration clarity has already been incorporated into our standard operating specification for the upcoming harvest cycle.

We are pleased to confirm full allocation for your Q1 and Q2 botanical distillate orders at the current contracted tier. All three lots of wild-harvested juniper and eastern hemlock extract will ship in nitrogen-flushed amber glass containers, accompanied by full gas chromatography certificates of analysis.

Please find the countersigned addendum enclosed for your records. Should your regulatory team require additional traceability documentation prior to the January 18 dispatch date, I would be glad to review the batch dossiers with you directly.

Yours sincerely,

Nora Gallagher
Managing Director, Formulation & Supply
